

Work list

1. Parking Area
 - Walk the parking area and pickup sticks, debris, anything that doesn't belong
 - Remove remnants of burn pile, move dirt to shooting berm.
 - **DEADLINE OCT 30th**
2. Barn
 - Scoop and pile the remaining horse manure from the inside of the barn. Level floor of barn.
 - Move wood pile from the right side of barn to the rear left.
 - Repair the roof. Install Tin
 - **DEADLINE OCT 31st**
3. Tree Trimming
 - Large Walnut at front of parking area. Needs limbs below 8ft to be pruned.
 - Pecan with the broken branch to the left of the list field, prune broken branch.
 - Two large trees on the right side of the list field, lowest branches need to be removed so tractor can mow around them (8ft clearance)
 - **DEADLINE OCT 31st**
4. Fences
 - Repair
 - "Entrance gate", the post that the gate latches to needs to be replaced. I have a 4x4 post in barn to replace it with. Unhook horse-fence, remove post, remove gate latch hardware, replace post and compact in place. Reattach hardware. Pound bends out of top of gate.
 - **DEADLINE DEC 31st**
 - Weed-eat and clean up the remaining interior fence lines, particularly the parking area entrance fence
 - **DEADLINE DEC 31st**
5. Open Fields
 - Pickup anything over 1" in diameter from fields and most importantly around all the trees so we can mow without any issues. Pile in tavern fire pit.
 - Fill in holes, depressions, etc. Going to take a scoop of dirt from the tractor and smoothed out with rakes.
 - **DEADLINE DEC 31st**
6. Campsites (forest)
 - Pickup anything over 1" diameter from the brush-hogged area.
 - Pull any fallen trees and cut into no more than 6ft long pieces so we can haul out with tractor.
 - Identify for approval your fire ring. It MUST be surrounded by brick, stone, or concrete.
 - Any permanent campsite must be maintained throughout the year.
 - Keep fallen branches, etc. picked up.
 - Keep fire ring from being over-grown.
 - Remove lowest branches from trees to make mowing easier.
 - **DEADLINE DEC 31st**
